#### 4.3 Performance Bank Guarantee (PBG)

Within fifteen (15) working days from the date of issuance of LOI, the successful Bidder shall at his own expense submit unconditional and irrevocable Performance Bank Guarantee (PBG) to the Authority. The PBG shall be from a Nationalized/ scheduled commercial Bank having branch at Guwahati in the format prescribed in Section 8 - Annexure 4, payable on demand, for the due performance and fulfillment of the contract by the bidder.

This Performance Bank Guarantee shall be for an amount equivalent to 10% of total contract value. PBG shall be invoked by Authority, in the event the Bidder:

- a) Fails to meet the overall penalty condition as mentioned in RFP Volume II or any changes agreed between the parties,
- b) Fails to perform the responsibilities and obligations as set out in the RFP to the complete satisfaction of Authority,

c) Misrepresents facts/information submitted to Authority

The performance bank guarantee shall be valid till satisfactory completion of Operation and Maintenance Period. The performance bank guarantee may be discharged/returned by Authority upon being satisfied that there has been due performance of the obligations of the bidder under the contract. However, no interest shall be payable on the performance bank guarantee.

In the event of the Bidder being unable to service the contract for whatever reason(s), Authority shall have the right to invoke the PBG. Notwithstanding and without prejudice to any rights whatsoever of Authority under the contract in the matter, the proceeds of the PBG shall be payable to Authority as compensation for any loss resulting from the bidder's failure to perform/comply its obligations under the contract.

Authority shall notify the bidder in writing of the exercise of its right to receive such compensation within 40 days, indicating the contractual obligation(s) for which the bidder is in default. Authority shall also be entitled to make recoveries from the bidder's bills, performance bank guarantee, or from any other amount due to him, an equivalent value of any payment made to him due to inadvertence, error, collusion, misconstruction or misstatement.

In case the project is delayed beyond the project schedule as mentioned in RFP Vol 2, the performance bank guarantee shall be accordingly extended by the Bidder till completion of scope of work as mentioned in RFP Volume II.

This Performance Bank Guarantee shall be valid up to six (6) months after successful completion of the contract for the total contract duration i.e., 'Go- Live' + 60 months of O&M.

On satisfactory performance and completion of the order in all respects and duly certified to this effect by the Project Coordinator, Contract Completion Certificate shall be issued and the PBG would be returned to the Bidder.

#### 4.27 Indicative resource requirement

Below is the indicative resource requirement for centralized administration of the Project

Sno.	Position	Quantity	Minimum Deployment during Implementation phase	Minimum Deployment during Operation and Maintenance phase
1	Project Manager	1	At least 80%	100%
2	Integrated Command and Control Centre (ICCC) Expert	1	At least 80%	Onsite Support to Project team on need basis
3	Solution Architect	1	At least 80%	Onsite Support to Project Team on need basis
4	Network & Security Infrastructure Expert	1	At least 60%	100%
5	Security & Surveillance Expert	1	At least 80%	100%
6	Server & Storage Expert	1	At least 60%	100%
7	Quality Control Expert	1	At least 80%	Onsite Support to Project team on need basis including quarterly visit and report submission

The above mentioned manpower requirement is minimum and if the SI believes that to meet the SLAs, additional resources are required, the same may be provided by the SI. GSCL can suggest changes in the aforementioned resource requirement as per the requirement. It is the SI's responsibility to identify and deploy the resources during the O&M phase.

The Command Centre Operators provided by the SI shall be responsible for verification and generation of the e-challans. They will also be responsible for providing support in

terms of monitoring of the data feeds at Command and Control Center and handholding the Officials from Police department required for operationalization of the Intelligent City Surveillance System project.

System Engineer - Hardware shall be responsible for first level of technical support in terms of ICT equipments placed at the Command and Control Centre as well as Help Desk functions.

SI shall deploy adequate site engineers required for smooth operation of the Project components.

SI shall deploy adequate Facility Management staff at Command and Control Centre. Facilities management shall include but not limited to building and grounds maintenance, cleaning, catering and vending, security, space management, utilities management etc. and associated manpower shall also be under the scope of the SI during Operation & Maintenance phase.

SI shall be required to provide such manpower meeting the following requirements:

All such manpower shall be without any criminal background /record.

Authority reserves the right to carry out background check of the personnel proposed on the Project for verification of criminal record, at the beginning of deployment or during deployment.

SI shall have to replace any person, if not found suitable for the job.

Operational Manpower shall work in at least 2 shifts, with no person being made to see the feeds for more than 8 hours at a stretch.

Detail operational guideline document shall be prepared during implementation which shall specify detail responsibilities of these resources and their do's and don'ts.

The SI has to provide the following Manpower's (Minimum no of Operators-8, software moderator and GIS resource (Qualification criteria all will be defined during Detailed Engineering phase)), and Facility Management Staffs-3 to maintain 24\*7 shift during the O&M phase for smooth operations and handholding of Authority and Stake holders.

SL No	Type of Manpower	Type of Work/ Minimum Wages	Shift Details	No of Staffs
1	Operator	Skilled	1 ( 6AM-2 PM)	3
2	Operator	Skilled	2 ( 2PM-10PM)	3

3	Operator	Skilled	3 ( 10 PM-6AM)	2
4	Facility Management Staff	Semi-Skilled	1 ( 6AM-2 PM)	1
5	Facility Management Staff	Semi-Skilled	2 ( 2PM-10PM)	1
6	Facility Management Staff	Semi-Skilled	3 ( 10 PM-6AM)	1
7	Software Moderator	Skilled		1
8	GIS resource	Skilled		1

#### 5.16 24 Port L3 Switch (fully loaded)

Sl. No.	Parameter	Modified Technical Specification	Technical Compliance (Yes/ No)	Remark
1	Ports	Must support minimum 24* 10G Port with necessary SFP+ Modules.(UTP or Fiber as per bidder design) (Fully loaded switch)		
2	MAC	Support 8K MAC address.		
3	Forwarding rate & Switching Capacity	Switching capacity of min. 40 Gbps or better and equivalent or better packet forwarding rate (Mbps)		
4	Port Features	Must support Port Mirroring, Port Trunking and 802.3ad LACP Link Aggregation port trunks		
5	Flow Control	Support IEEE 802.3x flow control for full-duplex mode ports.		
7	Protocols	<ul style="list-style-type: none"> <li>· Support 802.1D, 802.1S, 802.1w, Rate limiting</li> <li>· Support 802.1Q VLAN encapsulation, IGMP</li> <li>· Support based on 802.1p priority bits with at least 8 queues</li> <li>· DHCP support &amp; DHCP snooping/relay/optional 82/ server support</li> <li>· Shaped Round Robin (SRR) or WRR scheduling support.</li> <li>· Support for IPV6 ready features Support up-to 255 VLANs and up-to 4K VLAN IDs</li> </ul>		

8	Access Control	<ul style="list-style-type: none"> <li>Support port security</li> <li>Support 802.1x (Port based network access control).</li> </ul> Support for MAC filtering.		
9	VLAN	<ul style="list-style-type: none"> <li>Support 802.1Q Tagged VLAN and port based VLANs and Private VLAN</li> </ul> The switch must support dynamic VLAN Registration or equivalent		
10	Protocol and	<ul style="list-style-type: none"> <li>Network Time Protocol or equivalent Simple Network Time Protocol support</li> <li>Switch should support segmentation classification should be based on user-definable application types:DSCP, Port based, TCP/UDP port number</li> </ul>		
11	Management	Should support telemetry and streaming data Configuration management through CLI/GUI		

## 5.20 SAN STORAGE

Sl. No	Modified Technical requirement	Technical Compliance (Yes/No)	Remark
1	Storage Solution should be provided with NSPoF (No single point of failure) Architecture.		
2	The solution should allow upgrades of hardware and software for investment protection.		
3	Controllers: Minimum dual controllers with active-active architecture. Each controller shall be configured with minimum 32 x 2Ghz CPU core or higher		
4	Cache Memory: Should be provided with minimum 768GB cache or more.		
5	Connectivity: Minimum 4 x 32 Gbps FC ports per controller and 4 x 10/25 Gbps ports for SMB, NFS to be provided for host connectivity		
6	RAID Support: RAID 5/6 level Support		
7	Redundancy: Fans and power supplies: Dual redundant, hot- swappable		
8	Storage subsystem should support 10TB/12TB/14TB/18TB or higher NLSAS/SATA/equivalent 7.2K drives in the same device array.		
9	Should be supplied with 3 PB effective usable capacity storage with NL-SAS drives, Storage may need to increase incase 3PB not sufficient for 3month video footage without any compromise in quality.		
10	Should have the capability to designate global hot spares that can automatically be used to replace a failed drive anywhere in the system.		
11	Should be configured with required Global Hot-spares for the different type and no. of disks configured, as per the system architecture best practices.		

12	Multipath: Multi-path & Load balancing should be supported. Either Unlimited host multipath licenses should be quoted from day one OR the storage system must support native host OS based multipathing.		
13	Thin Provisioning: Array should be supplied with Thin provisioning for the configured capacity.		
14	De-duplication: Array should have capability to provide compression, de-duplication and encryption.		
15	Tiering: Should support inbuilt automated tiering feature that migrates the most frequently accessed data to the SSD, SAS Drives. Necessary licenses for configured capacity if required without additional cost		
16	Snapshots: Should be able to take "snapshots" of the stored data. Offered Storage shall have support to make the snapshot in scheduled or auto snaps. Snapshot should support both block and file.		
17	Replication: Array should have the capability to do remote replication using IP technology		
18	Software Licenses : All the necessary software and licenses to configure and manage the storage space, RAID configuration, logical drives allocation, snapshots, compression, de-dup, replication, auto-tiering for the configured capacity.		
19	Monitoring: Should support the functionality of monitoring of Disk drive and Storage system for all possible hard or soft failure.		
20	The Storage should be jointly validated by VMS (Video Management System) software and storage for better integration requirement		
21	Warranty: Five years on site warranty from OEM		
22	Storage must allow Dynamic RAID/Pool to allow minimum one drive addition for the capacity expansion in the existing capacity pool.		

### 5.21 BACKUP SOFTWARE

SL. No.	Modified Technical Requirement	Technical Compliance (Yes/No)	Remark
1	The solution should offer centralized, web-based administration with a single view of all back up activities and should have alerts generation facility in case of any issue in backup process.		
2	Support de-duplication at source and at target (disk) on any commodity storage volume/proposed disk appliance. Based on policy backup software should be able to move data to a tape/disk library automatically.		
3	Support scheduled unattended backup using policy-based management for all Server and OS platforms		
4	Should have in-built frequency and calendar-based scheduling system.		

5	Should be able to backup any applications in online mode through online SAN based backups of databases through appropriate agents; Important Applications such as Database, webserver, application, emails irrespective of the number of servers / CPUs, configuration of the servers, etc.		
6	Should be capable of having multiple back-up sessions simultaneously		
7	Should be capable of taking back up of SAN environment as well as LAN based backup.		
8	Should support different types of backup such as Full back up, Incremental back up, Differential back up, Selective back up, Point in Time back up and Progressive Incremental back up and snapshots		
9	Should have the ability to integrate with archival software and create a single repository for backup and archive for space efficiency and easier data management.		
10	Should have in-built media management and supports cross platform Device & Media sharing in SAN environment.		
11	Should be able to rebuild the Backup Database/Catalogue from tapes in the event of catalogue loss/corruption.		
12	Should have online backup solution for different type of databases such as Oracle, MS SQL and Sybase / DB2 etc. on various OS.		
13	Should be able to copy data across firewall.		
14	Should also be capable of reorganizing the data onto tapes within the library by migrating data from one set of tapes into another, so that the space available is utilized to the maximum. The software should be capable of setting this utilization threshold for tapes		
15	Should be able to maintain backup copies/versions based on the retention policy. It should be applicable to individual backed up objects/backup jobs.		
16	Must be offered with battery backed up RAM / NVRAM for protection against data loss in power failure scenario and continuous automated file system check to ensure data integrity		
17	The appliance must also prohibit NTP clock tampering to avoid any premature expiration of backup data.		

#### 5.45 Estimated MPLS network Plan and bandwidth requirement

SI is responsible for any additional hardware/software and Infrastructure work. Authority (GSCL) will not bear any additional cost for this services.

#### **Guidelines on Design Considerations for ICCR Room:**

- Space Allocation: The total area of approximately 3,000 Sq. Ft. (+/- 10%) to be divided into functional zones based on the requirements detailed during the engineering phase. Appropriate square footage for each area, such as the control room, reception, data center, meeting room, UPS room, restrooms, emergency exit, Executive Cabins, and conference room (30-Seater) to be allocated. UPS and Battery Room to be separate.

- Layout and Design: 3D Interior layout and design for the ICCC Room and each zone are to be submitted during the engineering phase and the approval process ensured at each stage of work.
- Furniture and Fixtures: This includes desks, chairs, conference tables, cabinets, and reception furniture as per technical specifications.
- Restroom and Amenities: Restroom fixtures and amenities are to be considered in compliance with local building codes.
- Emergency Exit and Safety: Emergency exits are to be compliant with safety regulations.
- Permits and Approvals: Costs of obtaining permits and approvals from local authorities, if applicable, to be considered.
- Documentation and As-Built Drawings: As-built drawings and documentation for future reference to be submitted.
- Environmental hygiene to be maintained in and around ICCC premises.

For Volume 3

**43 Penalties**

<p><b>43.3.</b> Maximum Penalty applicable for any quarter shall not exceed 20% of the 'applicable fees' for the respective quarter.</p>
--

<p><b>43.4.</b> Three consecutive quarterly deductions of 20 % of the applicable fee on account of any reasons shall be deemed to be an event of default and termination as per Clause 35 of this Section of RFP respectively and the consequences as provided in Clause 36 of this section of RFP shall follow.</p>
